

The World Congress 2009 on Medical Physics and Biomedical Engineering -the triennial scientific meeting of the IUPESM- will be held in Munich, Germany from Sept 7-12, 2009. It is dedicated to bringing together top-level people from these different areas in a single forum and will offer both: a global view on nearly everything in Medical Physics and Biomedical Engineering and a focussed and in depth view into specific research areas.

13 congress themes on medical technology and science will be featured along with five challenging medical topics to optimize synergies and the integration of themes on research, development and applications. Leading international experts will report about their latest results and will give comprehensive review lectures. More than 4,000 participants are expected to attend the congress. In addition to the challenging scientific sessions, the congress is also offering an appealing support program that presents valuable information on science, industry and medicine as well as opportunities for recruiting, cultural activities and networking.

Incorporated in the World Congress are the 17th International Conference on Medical Physics (**IOMP**), the 22nd International Congress on Biological and Medical Engineering (**IFMBE**), the 3rd European Conference on Medical Physics (**EFOMP**), the 40th Annual Meeting of the German Society for Medical Physics (**DGMP**) as well as the 43rd Annual Conference of the German Society for Biomedical Engineering (**DGBMT**).

The 2nd Call for Papers with detailed information on the scientific program and important dates as well as the Exhibitor and Sponsorship brochure are available on the Congress Website www.wc2009.org.

The Online Paper Submission System has opened on Dec 1, 2008.
Submission deadline is Feb 22, 2009.
